

# Confined Space Entry (ATP) Safety Class

*UTA Authorized Trainer Program Series*

**4 hour class**

**ABC of Oklahoma Training Facility**

During this training program, participants learn the proper procedures for entering a Permit-Required Confined Space. Each participant will be able to function in Confined Space Operations as an Entrant, Attendant or Entry Supervisor.

Modeled after the OSHA Outreach Program, the goal of the UTA Authorized Trainer Program is to provide training for workers about workplace hazards and safe work practices. Individuals designated as UTA authorized safety & health trainers address the recognition, avoidance, abatement, and prevention of safety and health hazards associated with specific issues in the workplace.

OSHA Authorized Trainer Program Series cards will be issued upon completion of class.
