

# Forklift Certification Class

*Powered Industrial Truck Operator Training Class*

**4 hour class**

**ABC of Oklahoma Training Facility**

**This training will provide both classroom and hands-on operations training for telehandlers. Upon successful completion students will receive a certification operator card.**

Elevate your workplace safety and ensure OSHA compliance with a Powered Industrial Truck Operator Training Class. This comprehensive program combines essential classroom instruction with hands-on evaluation to equip participants with the skills and knowledge needed for safe and effective operation of forklifts.

The classroom portion covers OSHA regulations, truck components, safe operation procedures, pre-operation inspections, and basic maintenance. Participants then engage in a hands-on evaluation to demonstrate practical skills and safety competency in real-world scenarios.

Led by experienced instructors, this training prioritizes safety and regulatory compliance to provide a robust learning experience.
