

# Scaffolding Safety AST Class

UTA Authorized Trainer Program

4 hour class

ABC of Oklahoma Training Facility

---

Hazard recognition, evaluation, and control; conducting hazard surveys and inspections; review of scaffolding regulations and requirements; types of scaffolding and associated hazards and requirements; eliminating and controlling hazards to include fall protection, falling objects, scaffold collapse, and electrocutions; access and egress; safety procedures and training requirements. This course is designed for personnel who will be responsible for safety at their job sites where scaffolding is used and/or who may be designated as the Competent Person by their employer for typical construction-related scaffolding erection, use, maintenance, and dismantling activities.

Upon successful completion of this course students will receive UTA Outreach completion cards.
